Experience

VEKTOGRAM - Renewable Energy Engineering

Apr 2025 – Present

After gathering knowledge in web technologies i started Vektogram as a project focused on improving renewable energy technology for Mexico. Using reliable technology and highly performant technology (Elixir) the objective is to create tooling that improves the energy transition, particularly in Mexico Sun Belt.

Rackspace Technology — Software Developer (Remote)

Nov 2021 – Mar 2025

At Rackspace i worked as a solution creator, inherited a full web design system focused on managing the web focused purposes and objectives of cloud giant like Rackspace, as well as helping every department reach their specific goals, either sales or legal compliance.

My day to day consisted of meeting requirements, proposing solutions, and implementing them as soon as possible but constrained to the system design and limitations. Task included web design, web development, dev ops tasks and stakeholder meetings.

Low Code Agency — Web Developer (Remote)

Aug 2020 – Sep 2021

At Low Code Agency i helped the team complement their app development sales with a marketing and sales oriented online presence for each client. My Tasks included web design, web development, sales focused design and client meetings.

Education

Universidad de Ciencias y Artes de Chiapas

Bachelor of Science (B.S.) in Renewable Energy Engineering, Aug 2017 – Nov 2021

Skills

- Systems Analysis, Process Mapping, Agile Methodologies, Requirements Gathering.
